F. 131 Main Street

I. Resolution 69-2017, A Resolution Conditionally Approving the Minor Subdivision Plat Titled Canyon Black Hawk Subdivision Filing #1

Mayor Spellman read the title and opened the public hearing.

Baseline Engineering Consultant Harris introduced this item and went over a few slides of their presentation. The site in question is between the Dakota site to the east, which recently received approval and is in the process of being excavated to create a new parking lot, and the previous Canyon Casino building to the west. He said the subdivision plat eliminates the 38 original Black Hawk lots to create one lot titled Canyon Black Hawk Subdivision Filing No. 1. The lot is in the Gold District zone. He said the applicant, Jacobs Entertainment, has been working with City Attorney Hoffmann and the Subdivision Improvement Agreement (SIA) is now signed and ready to be approved by Council. He said the SIA contains two exhibits, one for mass excavation, and the other for public improvements along Main Street. Staff recommends approval of Resolution 69-2017 with two conditions: minor red lines needed on the plat, including vacating two easements the City doesn’t need anymore, and the applicant to pull an excavation permit prior to any work taking place. City Attorney Hoffmann
confirmed that if approved, Resolution 69-2017 only authorizes the excavation and creates a legal lot of record.

The applicant was present, but declined the offer to comment at this time.

PUBLIC HEARING: Mayor Spellman declared a Public Hearing on Resolution 69-2017, a Resolution conditionally approving the Minor Subdivision Plat titled Canyon Black Hawk Subdivision Filing #1 open and invited anyone wanting to address the Board either “for” or “against” the proposed ordinance to come forward.

No one came forward to speak and Mayor Spellman declared the Public Hearing closed.

II. Resolution 70-2017, A Resolution Conditionally Approving a Certificate of Appropriateness and Site Development Plan to Construct a Parking Lot, Parking Garage, and Approve Variances from the Zoning Ordinance

Mayor Spellman read the title and noted for the record that there was no resolution in the packet, because staff was recommending continuation of this item based on the information they had as of today, and that if the applicant were to push City Council for a decision today it would be a denial based on the information they have. Mayor Spellman then opened the public hearing.

Baseline Engineering Consultant Harris continued with his slide presentation. He said this project contains eight items, four of which staff is satisfied with: a new 3-level garage to include 302 parking spaces, a surface lot adjacent to the garage for an additional 97 spaces to provide a total of 399 spaces that will connect to the Dakota parking lot currently under construction, so that vehicles can go back and forth through the parking lots, and the excavation of 81,100 cubic yards of earthwork. He said the next four items staff does have concerns with and still require additional details: the finish of the proposed cut slope on the property, the proposed architectural façade, the potential encroachment of the 100-year floodplain, and the two requested zoning variances. He noted that historically, variances in the GOLD District have been granted through a Planned Unit Development (PUD) process,
similar to the Monarch project, but the applicant chose not to submit a PUD. Staff recommends that not all of the City’s criteria have been met and a motion to continue the application should be considered until additional issues have been resolved. City Attorney Hoffman asked Harris if staff has the rest of the site wrapped up consistent with Council’s direction, could staff make a better determination of compatibility as it relates to the variances. Harris responded yes.

Discussion ensued on the architectural elements of the structure and the surface treatment. Council agreed the design looks very contemporary and it did not look like the applicant used any historical elements as per the design standards. As for the slope cut, Mayor Spellman asked Council if the applicant, who was proposing to match the Dakota sculpted shotcrete only by the upper hillside on the Dakota side behind their garage, were to take the sculpted concrete down to the ground in that corner, would they be satisfied with not requiring the applicant to provide sculpted concrete of the balance behind the garage over to the Canyon building, which staff is recommending, since it really will not change the appearance as it will not be seen from the road, and it would be a good compromise since Council required the entire Dakota site to be sculptured shotcrete at their hearing. Council agreed that was acceptable.

The applicant, Dave Grunenwald, Vice-President of Development for Jacobs Entertainment, was present. He began by addressing the reason why he chose not to submit a PUD application. He believes a PUD should show expected future development, and they do not have any concrete plans at this time for that site. He said their intention was solely to buy the Canyon site, level it, and put in parking. He went on to rationalize their design concept and said they were open to suggestions. Mayor Spellman suggested they view the Lady Luck parking structure to look for those elements in their design, and maybe other material other than so much brick, since this is such a prominent location on Main Street. The sculptured shotcrete all the way down the Dakota site was discussed further as well.

Bob Schnautz, of River Studio Architects in Golden, was present on behalf of the applicant to help discuss the façade design and the front setback and landscape variances sought.

Mayor Spellman was confident that the applicant will work with staff to get the floodplain issue and variances resolved. City Attorney Hoffmann recommended continuing the application to a date certain to prevent noticing for the public hearing again.
