City Attorney Hoffmann introduced this item. He said the City has a revenue number that it seeks to achieve each budgetary year based on device tax, and since devices fluctuate from month to month, this Ordinance would take the device tax up to the maximum amount approved by Black Hawk voters, but then provide rebates back to the casinos, through their sales tax returns, based on a formula for every dollar generated above the City’s budgeted revenue. He said the purpose is not to have the City collect more than it needs for its budgeted revenue and at the same time remain TABOR compliant.

Linker said the proposed bridge will be located in Chase Gulch by Castle Rock and will be 10-foot wide by 40-foot long. She said that historically there was a bridge in this same area, but over time that bridge was demolished. She confirmed that the new bridge meets Black Hawk’s criteria for a Certificate of Appropriateness, as well as the Secretary of the Interior’s Standards and Guidelines for Rehabilitation of Cultural Landscapes. Staff recommends two conditions for approval.

Ms. Hart, introduced herself for the record. She said she has been working on the Maryland Mountain Project over the last few years and spoke briefly about the project. She wanted to add that the proposed design was chosen to match the historic bridge that existed right across Main Street, and which was included in the packet. She said she found a prefabrication bridge company that manufactures that particular design, which she felt was an economical choice for the City.

Mayor Spellman added that a comprehensive work shop with Mary Hart and Stolfus Engineering on the trailhead itself would be scheduled next year. He noted that the Master Plan will need to be updated to reflect the decisions that have been made. City Manager Lewis will notify Ms. Hart when it is ready to be updated.

City Manager Lewis questioned why the plans needed to meet AASHTO standards as that is usually a highway requirement. Linker responded since this was strictly foot and bicycle traffic, and not for vehicles, she agreed having a structural engineer stamp and sign off on the plans would be sufficient. It was noted that condition would be removed from the resolution.

She said back in 2014 this site was included in a Historic Resource Survey conducted by Mountain States Historical and that the house was identified in that survey, yet it was determined that although the residence was built in 1872 it had been relocated to the present site in the late 1960s-1970s, and because of that it was not individually eligible for the National Register of Historic Places.
