**MEMORANDUM OF UNDERSTANDING ESTABLISHING THE
CLEAR CREEK WATERSHED & FOREST HEALTH PARTNERSHIP FOR
COLLABORATION AND COORDINATION IN WILDFIRE RISK MITIGATION AND
FOREST HEALTH PROJECTS WITHIN THE CLEAR CREEK WATERSHED**

1.0 **PARTIES.** This Memorandum of Understanding ("**MOU**") Establishing the Clear Creek Watershed & Forest Health Partnership ("**Partnership**") is entered into by and between the **City of Arvada**, a home rule municipal corporation of the State of Colorado; the **City of Black Hawk**, a home rule corporation and political subdivision of the State of Colorado; the **County of Clear Creek**, a body politic and corporate and political subdivision of the State of Colorado; the **Clear Creek Fire Authority**, a consolidated fire protection and emergency service agency; the **Town of Empire**, a statutory corporation and political subdivision of the State of Colorado; the **County of Gilpin**, a body politic and corporate and political subdivision of the State of Colorado; the **City of Golden**, a home rule corporation and political subdivision of the State of Colorado; the **County of Jefferson**, a body politic and corporate and political subdivision of the State of Colorado; and the **City of Westminster**, a home rule municipality, hereinafter referred to collectively as the "**Parties**" or "**Members**," or individually as a "**Party**" or "**Member**."

2.0 **BACKGROUND.**

2.1. The Clear Creek Watershed ("**Watershed**") spans from its western edge at the Continental Divide to the urbanized plains outside of Denver where Clear Creek joins the South Platte River. The entire Watershed covers an area of 575 square miles, with 400 square miles located in the 'upper' watershed in the mountains west of Golden. Nearly two-thirds of the upper Watershed lies within the Arapaho and Roosevelt National Forests and is administered by the Clear Creek Ranger District. The rest of this mountainous region is covered by a patchwork of private, municipal, county, and state lands. Clear Creek and its tributaries act as the primary drinking water supply for multiple towns and municipalities, serving nearly 450,000 Colorado residents. This forested area and the creek corridor also act as a critical area for recreation, cultural and historical values, and transportation. See **Exhibit A**, depicting the geographical area of the Watershed.

2.2. The Clear Creek watershed is vulnerable to catastrophic wildfire and post-wildfire flooding and water quality impairments, debris flows, and economic impacts. Historical fire suppression policies, development in the wildland-urban interface, and climate change have combined to elongate the wildfire season and to make contemporary wildfires hotter and larger. The communities in the watershed and the people who depend on Clear Creek for water resources are facing increasing wildfire risks.

2.3. An engineering study for the upper Clear Creek watershed was conducted between the Fall of 2019 and Spring 2021 (the "**Upper Clear Creek Watershed Pre-Wildfire Planning Study**", or "**Study**"), attached hereto as **Exhibit B**. The Upper Clear Creek

Pre-Wildfire Planning Study identifies and assesses sustainability and resiliency in a post-fire scenario relative to changes in hydrology and hydraulics at critical, high priority locations or stream segments. This study also analyzed a suite of options to manage forests and fuels, restore and improve stream channels, assess and mitigate the Wildland-Urban Interface (“WUI”), and form multi-objective partnerships around critical resources and infrastructure values. From this effort, the impacted Parties have agreed to create a collaborative group, to implement a wildfire risk mitigation program for the Clear Creek basin based on the pre-fire study recommendations.

3.0 STATEMENT OF MUTUAL BENEFIT AND INTERESTS.

- 3.1. The Parties recognize, accept, and respect the differences in missions, goals, and objectives of each other. However, wildfire does not recognize or respect jurisdictional boundaries. The Parties therefore agree to work collaboratively and in a coordinated fashion to achieve the mission and objectives sought and described herein.
- 3.2. The Parties acknowledge that any Party to this MOU may participate in local activities or implement decisions related to forestry management as part of their site-specific obligations, responsibilities, and authorities. This MOU is not meant to supplant any Party's discretionary authority to make decisions about forest management or wildfire response associated with their individual jurisdictions.
- 3.3. This MOU is non-binding and does not obligate any funds of the Parties. As funding and resources are available and authorized (as determined in each Party's sole discretion), the Parties will provide technical, human, and/or financial support to the Partnership.
- 3.4. In consideration for the premises set forth above, each Party commits to:
 - 3.4.1. Work within their own statutory and regulatory authorities, including planning and decision-making requirements where applicable.
 - 3.4.2. Collaborate and coordinate to implement this MOU to achieve the mission and objectives expressed herein.

4.0 STATEMENT OF MUTUAL UNDERSTANDING.

- 4.1. This MOU creates no right, benefit, or trust responsibility, substantive or procedural, enforceable by law or equity. The Parties shall manage their respective resources and activities in a separate, coordinated and mutually beneficial manner to achieve the outcomes sought and described within the MOU. Nothing in this MOU authorizes any of the Parties to obligate or transfer anything of value.
- 4.2. Specific prospective projects or activities that involve the transfer of funds, services, property, and/or anything of value to a Party or other entity, requires the execution of separate agreements and are contingent upon numerous factors, including, as applicable,

but not limited to: agency availability of appropriated funds and other resources; Party availability of funds and other resources; agency and Party administrative and legal requirements (including agency authorization by statute); etc. This MOU neither provides, nor meets these criteria. If the Parties elect to enter into an obligation agreement that involves the transfer of funds, services, property, and/or anything of value to a Party or other entity, then the applicable criteria above must be met. Additionally, under a prospective agreement, each Party operates under its own laws, regulations, and/or policies. The negotiation, execution, and administration of these prospective agreements for the Partnership must comply with all applicable law.

4.3. Nothing in the MOU is intended to alter, limit, or expand the statutory and regulatory authority of any Party. Nothing herein shall be construed or interpreted as a waiver, express or implied, of any of the notice requirements, defenses, immunities and limitations of liability that the Parties and their respective officers and employees may have under the Colorado Governmental Immunity Act (C.R.S. Section 24-10-101, et seq.) and under any other law.

5.0 PURPOSE.

5.1. The Parties are entering into this MOU to establish the Partnership as an informal, unincorporated collaborative organization, in which the members set mutual goals and priorities, utilize existing forest management tools and legal authorities, and align their decisions on where to make the investments needed to achieve the mission and objectives set forth for the Clear Creek Watershed.

5.2. The Partnership would like to become an affiliate organization of Coalitions & Collaboratives, Inc. (“COCO”), or a like entity, in order to access their resources, which include financial management and human resource services, reduced insurance costs, access to a shared pool of experts and experience, and organizational start-up support. COCO’s Affiliate Agreement Template is attached to this MOU as Exhibit C, as an example of what the affiliate agreement may entail. Should the Parties decide to enter into such an Affiliate agreement, the Parties must comply with section 4.2 of this MOU.

6.0 MISSION, VALUES, AND OBJECTIVES.

6.1. MISSION. The mission of the Partnership is to engage in collaborative, cross-jurisdictional planning of wildfire risk mitigation and forest health projects within the Clear Creek Watershed.

III. EXHIBITS INCORPORATED BY REFERENCE

The following exhibits are attached and hereby made a part of this Agreement:

Exhibit A: COCO Purpose & Objectives

Exhibit B: Fiscal Hosting Policy

Exhibit C: Federal Funds Addendum

Exhibit A: COCO purpose & objectives

COCO’s purpose is to increase on-the-ground efforts to protect, enhance, and restore natural resources through collaborative conservation. Our objectives include:

1.) Capitalize on economies of scale:

- Employ a consistent and consolidated bookkeeping and financial management approach for all affiliates operating under the group determination, or affiliates utilizing financial management or human resources (HR) services;
- All affiliates operating under the group determination or utilizing financial management services will have their revenue and expenses tracked utilizing separate accounts so each affiliates funds are recognized separately and uniquely, and each group can “own” its own assets, seek its own grants and donations, and budget funds for its own mission, while still being accountable, transparent, and consistent with OMB’s Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards; the Federal Single Audit Act; and the nonprofit requirements of the Internal Revenue Code;
- Reduce insurance costs through group purchased insurance for general liability, umbrella liability, and similar insurances. Each group will need its own Directors & Officers (D&O) policy, though affiliates utilizing HR services will benefit from lower cost D&O.
- Increase payroll efficiencies with more people in the system. Costs for certain employee benefits go down as group size increases, and better benefits can attract and increase the retention of employees. Administrative costs for the payroll function and other HR functions decrease slightly on a per employee basis by combining staffs.
- All staff working under the group determination or for affiliates utilizing HR services will be paid by the COCO payroll system.
- Although paid by COCO, staff and other expenses will be allocated to the respective affiliates against their revenue class in order to assure that each affiliate is responsible for defining and complying with budget expectations and to assure each affiliate that the money they are raising is appropriately going to their own work;
 - The opportunity for purchasing supplies in bulk, such as erosion control blankets or seed, to reduce the cost of projects.

2.) Provide a shared pool of experts and experience:

- Have the ability to hire certain staff that are shared among the group of member affiliates. For example, we may hire a staff Professional Engineer who is shared across projects and programs of the varying affiliates, or a full-time facilitator who can work with the various affiliates on things like strategic planning, developing Community Wildfire Protection Plans, Source Water Protection Plans, or other similar plans, through stakeholder-driven processes;
- Computer systems—COCO already has developed tools like cloud-based databases, and has a robust GIS program that will be shared across affiliates to provide consistent data development and outcome reporting to funders and stakeholders;
- Create a shared leadership training program that builds board and staff capacity and knowledge in a uniform fashion and creates shared apprenticeship and exchange of know-how between staff of the various organizations;

- Apply consistent policies and procedures across organizations for high accountability and transparency and utilized standardized forms, data sets, etc;
- And, act as a training ground for emerging professionals through internship programs, and association with Americorp and affiliated programs, such as VISTA, NCCC, youth corps, and veteran's green corps.

3.) Create a sense of community and support that helps people and businesses derive benefit from participating in collaborative conservation activities:

- Leveraging COCO's various partners, partnerships and networks between affiliates;
- Increases crew-member retention as positions are created across areas, and allows for upward growth for younger crew members;
- Engage funders with a new high-impact model that's based on a proven organizational model;
- Increase volunteerism opportunities for outdoor stewardship and public safety related to natural disasters and their recovery.

4.) Increase awareness for watershed-and other natural-resource-related issues across the country:

- Consistent messages from various affiliates;
- Engage more citizens on-the-ground activities;
- Increase recognition in the funder community;
- Create synergy and energy for new affiliates by connecting them to others.

5.) Provide start-up support to new organizations:

- COCO will be able to assist new affiliates with funding support during their formative period from donations made to COCO.
- Provide technical support and training to staff and boards of new organizations.

6.) Provide competitiveness for larger and different grants and donations to be shared across multiple entities.

- Many funders are looking for ways to increase the impact of their contributions by supporting the expansion of scalable, successful models, and COCO does that.

Activities of affiliates operating under COCO, include, but are not limited to:

- Environmental education for K12, and college students.
- Public education and outreach around natural resource and emergency response topics, such as watershed health; forest-to-faucet connections; insect, disease, and invasive species impacts; water and energy conservation, etc.
- Stakeholder-driven plan development for a variety of planning purposes.
- Forest health and fuel mitigation projects to reduce the spread and impact of wildfires.
- Operation of red-carded wildland fire team that works in conjunction with local fire protection districts, state and federal fire management agencies, and other nonprofit fire teams.
- Wildfire and flood rehabilitation programs to protect life and property, and downstream values at risk.
- Emergency response activities such as coordinating volunteer efforts following a fire or flood, and assisting local government Emergency Managers during the disaster.
- Implementation of river restoration and habitat projects to improve water quality and wildlife habitat.
- Implementation of environmental BMPs.
- Abandoned mines clean up projects to improve water quality and public safety.

- Recreational development, improvement, or maintenance projects in partnership with public land managers in order to support public access and enjoyment of our great outdoors.
- Monitoring (or research) of water quality, air quality, habitat, forest health, or other natural resource values.

EXHIBIT B TO Affiliate Agreement**Fiscal Hosting**

COCO was established to assist other collaborative-types of conservation organizations, and as such, may fiscally host or manage external coalitions (nonprofits) or collaborative groups. As such, COCO has the following financial policies related to our hosting of organizations:

- All funds for hosted organizations will be tracked by accounting staff in such fashion as to provide for clear accountability of each organization's assets, donations, funds, etc.
- Reports of finances will be provided at least quarterly, or monthly if volume of transactions warrants more frequent reporting, to the key contact (Executive Director, treasurer, or other designated individual for the fiscally hosted organization).
- Key contact shall provide COCO accounting staff with information necessary for creating billing codes or classifications for tracking funding in the fashion they need for analysis of program outcomes and reporting back to funders and supporters.
- Key contact may request a meeting to review financials with COCO CEO and accounting staff at any time.
- If the fiscally hosted organization is a 501(c)3 nonprofit, key contact is responsible for maintaining the organization's status with the Secretary of State, assuring submittals to the IRS, and other management duties, but COCO staff will work to assure that the key contact has pertinent information in timely fashion to meet these obligations.
- COCO has a set 2% per annum charge against managed funds, which is calculated monthly, plus any direct fees charged by banks or other fund managers. This is charged on average funds of prior month (balance times 0.0016 per month). Managed funds are large funds that kept in an endowment or restricted account with an investment strategy to grow the principal.
- COCO will establish a separate money market account for managing funds in excess of \$2,000. Interest will be credited back to the organization. COCO will transfer funds as needed to cover bills and expenses paid out of COCO's accounts.
- If the organization has less than \$2,000 in cash assets, the funds may be commingled in COCO's checking account or savings account, but will still be tracked separately and fully documented.
- COCO will charge actual expenses to group through invoicing for payroll (program management services), supplies and materials, equipment, contracts and contractors, and other similar expenses that are incurred for the affiliate's program of work.
- COCO will charge a 5% indirect rate on the above charges, plus a prorated portion of insurance costs that are shared among organizations (includes life/disability for paid staff, general liability, umbrella liability, environmental liability). Proration of insurance will be based on percentage of payroll (either actual staff or contracted) for the previous period.
- Vehicles owned by COCO or CUSP and used by an affiliate organization are charged a daily usage fee of \$25, which covers auto insurance, depreciation, and general maintenance. Charges are also established on other equipment (and shared on Smartsheet), and will be reviewed with an affiliate prior to their using the equipment.
- If an organization no longer wishes to be fiscally hosted by COCO, they should notify us in writing, and we will close out their account and submit their money to another fiscal host or them directly if they have become a registered nonprofit, within 30 days of notification.
